Prevalence and importance of polymorphism occurring in pharmaceutical compounds are well recognized. It is of great importance to prepare and select the right form from the beginning during drug discovery and development.

### **A practical guide to pharmaceutical polymorph screening**

Polymorphism in crystalline solids is defined as materials with the same chemical composition, different lattice structures and/or different molecular conformations, . . . Pseudopolymorphism is a term that refers to crystalline forms with solvent molecules as an integral part of the structure, . . . In a supramolecular sense, polymorphism is the ...
