Design guideline for Small Waste Water Treatment Works

Water treatment is any process that improves the quality of water to make it more acceptable for a specific end-use. The end use may be drinking, industrial water supply, irrigation, river flow maintenance, water recreation or many other uses, including being safely returned to the environment.

Water treatment - Wikipedia

The Long Term 2 Enhanced Surface Water Treatment Rule addresses the health effects associated with Cryptosporidium in surface water used as a drinking water supply. These guidance documents provide information on the source water sampling monitoring requirements for Cryptosporidium and the

Long Term 2 Enhanced Surface Water Treatment Rule

Sewage treatment is the process of removing contaminants from municipal wastewater, containing mainly household sewage plus some industrial wastewater.

Sewage treatment - Wikipedia
