electrical spectrum and network pdf

A network analyzer is an instrument that measures the network parameters of electrical networks. Today, network analyzers commonly measure s -parameters because reflection and transmission of electrical networks are easy to measure at high frequencies, but there are other network parameter sets such as y -parameters, z -parameters, and h -parameters.

The Smith Chart was originally created many years ago as an RF engineering aid by Phillip Smith of RCA. Actually, Smith may not have been the first inventor of this tool -- a Japanese engineer named Kurakawa independently created a similar chart about a year before Smith.
